DETAILED ACTION***Claim Objections***

1. Claim 1 is objected to because of the following informalities: It is not clear as to where the preamble and body of the claim are provided. It appears the body of the claim is functional language only. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim. (*The phrase in question is "a predetermined zooming step that is **other than a telephoto end and a wide-angle end**"*).

Claims 6 is considered indefinite because it is not clear what is meant by the phrase "that *switches* an aperture of the sectors". This limitation is considered indefinite because it is not clear what function/action this limitation specifies.

Claims not specifically mentioned are rejected based upon their dependence from a rejected claim.

Art Unit: 2873

Examiner's Comment

4. Due to the indefiniteness of the claimed invention, allowability of claims could not be determined.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Nishimura (6222684) is cited for disclosing a zoom lens barrel with limitation drawn to both the wide-angle and telephoto ends, and an aperture with diaphragm blades.
